## DECLARATION OF CONFORMITY

according to the Machinery Directive 2006/42/EC, according to the EMC Directive 2004/108/EC

## FÖRSÄKRAM OM ÖVERENSSTÄMMELSE

enligt Maskindirektivet 2006/42/EG, enligt EMC-Direktivet 2004/108/EG

**Type of equipment** Materialslag

Welding Automat

**Brand name or trade mark** Fabrikatnamn eller varumärke

ESAB

**Type designation etc.** Typbeteckning etc.

MechTrac 1730/2100/2500/3000, from Serial number 644 (2006 week 44)

**Manufacturer or his authorised representative established within the EEA**

**Name, address, telephone No, telefax No:** Tillverkarens namn, adress, telefon, telefax:

ESAB AB, Welding Equipment

Esabvägen, SE-695 81 LAXÅ, Sweden

Phone: +46 584 81 000, Fax: +46 584 411 924

**The following harmonised standard in force within the EEA has been used in the design:**

Följande harmoniserande standarder har använts i konstruktionen:

EN 60204-1, Safety of machinery – Electrical equipment of machines – Party 1: General requirements

EN 12100-1, Safety of machinery – Part 1: Basic terminology, methodology

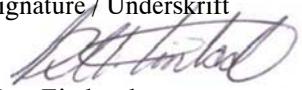

EN 12100-2, Safety of machinery – Part 2: Technical principles

EN 60974-10, Arc welding equipment – Part 10: Electromagnetic compatibility (EMC) requirements

**By signing this document, the undersigned declares as manufacturer, or the manufacturer's authorised representative established within the EEA, that the equipment in question complies with the safety requirements stated above.**

Genom att underteckna detta dokument försäkrar undertecknad såsom tillverkare, eller tillverkarens representant inom EES, att angiven materiel uppfyller säkerhetskraven angivna ovan.

## 1 SAFETY

---

### 1.1 General

Users of ESAB welding equipment have the ultimate responsibility for ensuring that anyone who works on or near the equipment observes all the relevant safety precautions. Safety precautions must meet the requirements that apply to this type of welding equipment. The following recommendations should be observed in addition to the standard regulations that apply to the workplace.

All work must be carried out by trained personnel well-acquainted with the operation of the welding equipment. Incorrect operation of the equipment may lead to hazardous situations which can result in injury to the operator and damage to the equipment.

1. Anyone who uses the welding equipment must be familiar with:
  - its operation
  - location of emergency stops
  - its function
  - relevant safety precautions
  - welding
2. The operator must ensure that:
  - no unauthorised person is stationed within the working area of the equipment when it is started up.
  - no-one is unprotected when the arc is struck
3. The workplace must:
  - be suitable for the purpose
  - be free from draughts
4. Personal safety equipment
  - Always wear recommended personal safety equipment, such as safety glasses, flame-proof clothing, safety gloves.
  - Do not wear loose-fitting items, such as scarves, bracelets, rings, etc., which could become trapped or cause burns.
5. General precautions
  - Make sure the return cable is connected securely.
  - Work on high voltage equipment **may only be carried out by a qualified electrician.**
  - Appropriate fire extinguishing equipment must be clearly marked and close at hand.
  - Lubrication and maintenance must **not** be carried out on the equipment during operation.

# WARNING

**ARC WELDING AND CUTTING CAN BE INJURIOUS TO YOURSELF AND OTHERS. TAKE PRECAUTIONS WHEN WELDING. ASK FOR YOUR EMPLOYER'S SAFETY PRACTICES WHICH SHOULD BE BASED ON MANUFACTURERS' HAZARD DATA.**

**ELECTRIC SHOCK - Can kill**

- Install and earth the welding unit in accordance with applicable standards.
- Do not touch live electrical parts or electrodes with bare skin, wet gloves or wet clothing.
- Insulate yourself from earth and the workpiece.
- Ensure your working stance is safe.

**FUMES AND GASES - Can be dangerous to health**

- Keep your head out of the fumes.
- Use ventilation, extraction at the arc, or both, to take fumes and gases away from your breathing zone and the general area.

**ARC RAYS - Can injure eyes and burn skin.**

- Protect your eyes and body. Use the correct welding screen and filter lens and wear protective clothing.
- Protect bystanders with suitable screens or curtains.

**FIRE HAZARD**

- Sparks (spatter) can cause fire. Make sure therefore that there are no inflammable materials nearby.

**NOISE - Excessive noise can damage hearing**

- Protect your ears. Use earmuffs or other hearing protection.
- Warn bystanders of the risk.

**MALFUNCTION - Call for expert assistance in the event of malfunction.**

**READ AND UNDERSTAND THE INSTRUCTION MANUAL BEFORE INSTALLING OR OPERATING.**

**PROTECT YOURSELF AND OTHERS!**

## 1.2 Markings on the equipment

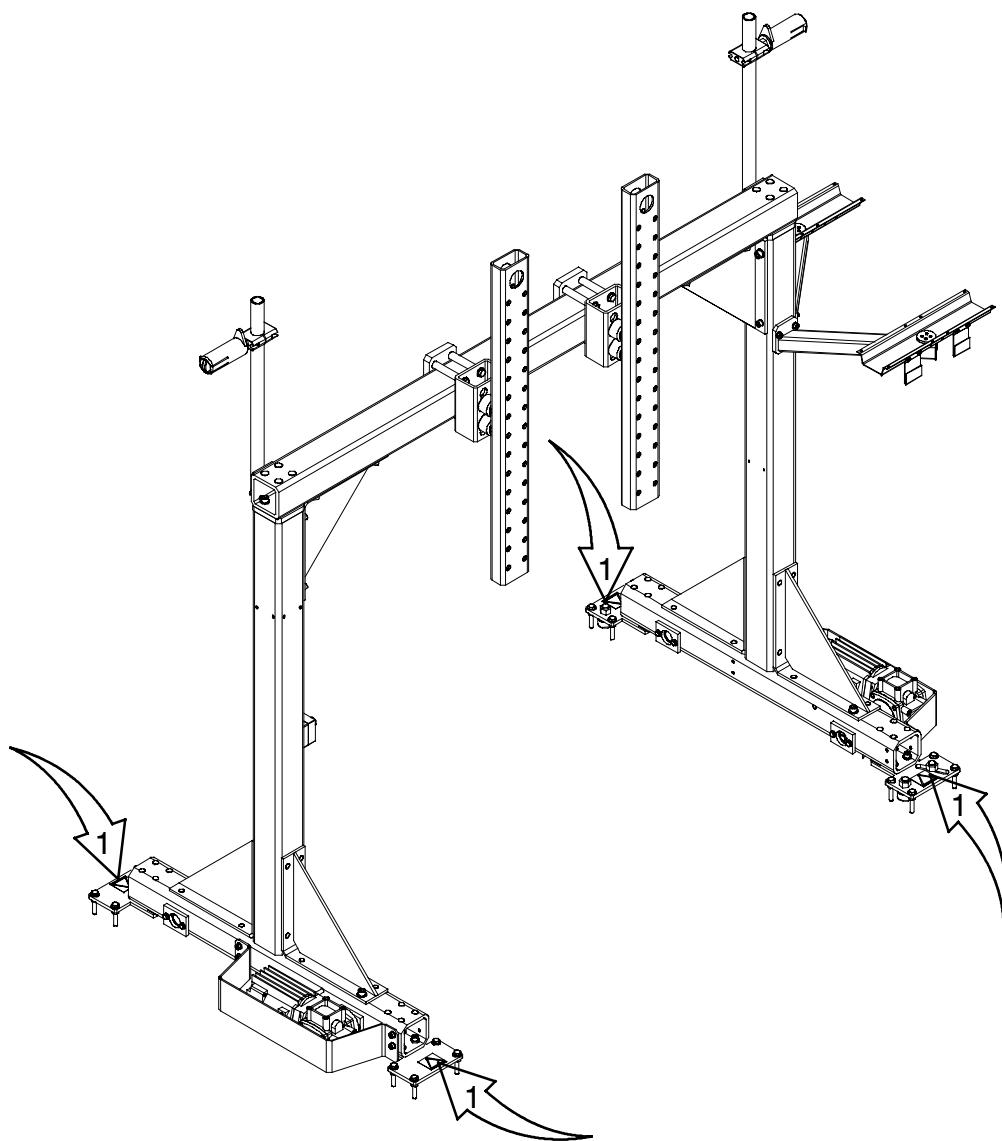

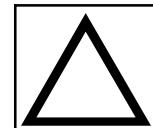

### Travel motion

These markings are placed on the gantry.  
Indicate the travel direction.

### Risk of getting pinched

This marking is placed on the support (1) of the gantry.

---

## **2 INTRODUCTION**

---

### **2.1 General**

MechTrac is a motor driven gantry for use together with ESAB's A2 welding equipment and power sources (LAF/TAF).

The control of the travel motor takes place over the PEK control unit where the desired speed can be set.

For more information regarding the PEK see instruction manual  
0460 948 xxx, 0460 949 xxx, 0459 839 036.

### **2.2 Technical data**

<b>Travel speed :</b>	0.2 - 2.0 m/min
<b>Maximum load :</b>	220 kg
<b>Standard rail length :</b>	3 m

Equivalent continuous A-weighted noise pressure is below 70 dB (A).

## 3 INSTALLATION

### 3.1 General

***The installation must be executed by a professional.***

Read the separate instruction manuals supplied with the different modules that are to be fitted on the gantry.

For installation of :

- welding head A2SFE1/ A2 SGE1 see instruction manual 0456 552 xxx
- welding head A2SF J1/ A2SF J1 Twin/ A2SG J1/ A2SG J1 4WD see instruction manual 0449 175 xxx
- welding power source LAF 631 see instruction manual 0449 501 xxx
- welding power source LAF 1001/ 1000M see instruction manual 0449 503 xxx
- welding power source TAF 801 see instruction manual 0449 509 xxx

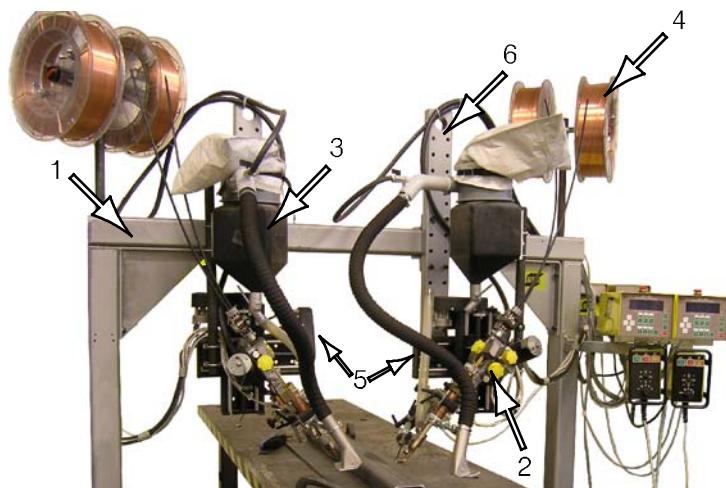

#### Voltage supply

- Disconnect the voltage supply before starting the installation!

### 3.2 Assembly/ Disassembly

The picture below shows an example of how to attach an A2 welding head, flux container, wire bobbin and slide to the gantry.

1. Gantry
2. Welding head
3. Flux container
4. Wire bobbin
5. Slide
6. Bracket

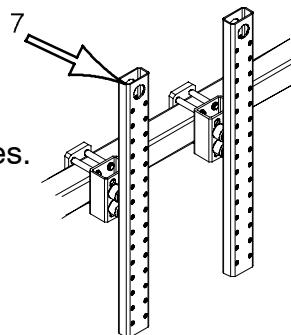

Make sure all the comprised modules are properly fastened.  
Loose parts falling off can involve danger and even unbalance when lifting.

Note that the maximum weight allowed on the gantry is 220 kg.

When necessary use a lifting strap for lifting the different modules.

Use a lifting device when dismounting the bracket.  
The lifting device is to be mounted in the holes (7) on top of the bracket.

### **3.3 External emergency stop**

For connection of the emergency stop placed on the gantry leg see the diagram on page 16.

### **3.4 Emergency stop circuit**

For connection of the emergency stop circuit between the PEK and the welding power source (LAF/TAF) see diagram on page 16.

## 4 OPERATION AND MAINTENANCE

### 4.1 General

***Caution:***

*Have you read and understood the safety information ?  
You must not operate the machine before then !*

***General safety regulations for the handling of the equipment can be found on page 5. Read through before you start using the equipment!***

***Note:***

*All warranty undertakings given by the supplier cease to apply if the customer attempts to rectify any faults on the machine during the warranty period.*

**Voltage supply**

- Disconnect the voltage supply before carrying out any maintenance work!

For operation and maintenance, see the respective manual for PEK, A2 welding equipment and power sources (LAF/TAF).

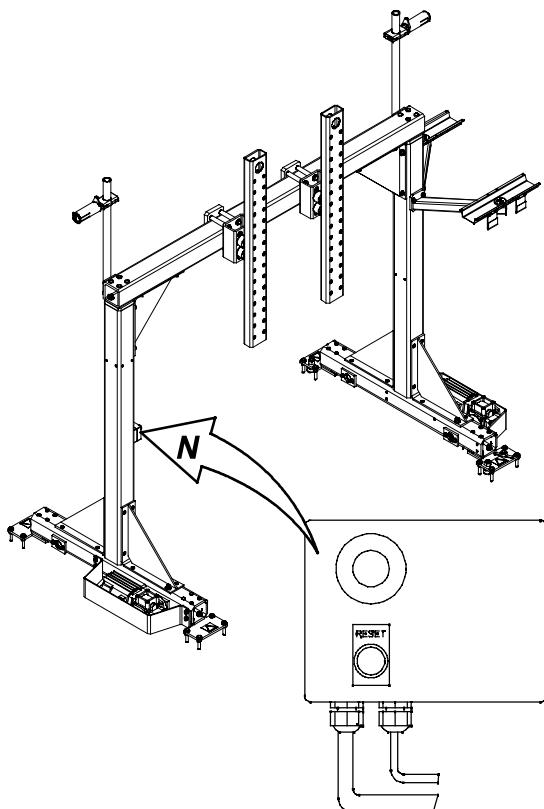

## 4.2 Emergency Stop

MechTrac is provided with an emergency stops (**N**).

### Resetting After Emergency Stop:

1. Find and eliminate the cause of the emergency stop.
2. Pull out the emergency stop button
3. Press “**Reset**”.

**N.B.** An emergency stop must not be reset until the cause for the abnormal function or signal has been defined and remedied.

### Test and Check of Emergency Stop

*The function of all emergency and safety devices is to be checked regularly, at least once every month, as well as after any work has been carried out on the machine.*

### **N.B.**

Any abnormal function or signal must be defined and remedied before the welding column and boom unit is put into operation.

---

## 5 ACCESSORIES

---

### 5.1 A2 GMAW (Gas Metal Arc Welding)

Cooling unit OCE 2H .....	0414 191 881
Gas hose .....	0190 270 102
Water hose .....	0190 315 104

### 5.2 A2 SAW (Submerged Arc Welding)

Conversion kit Twin .....	0413 541 882
Conversion kit A2 SAW→ MIG/MAG .....	0461 248 880
Plastic wire reel .....	0153 872 880
Steel wire reel .....	0416 492 880
Flux recovery unit A6 OPC .....	0148 140 880
Air hose .....	0190 343 102
Flux funnel .....	0145 221 881
Air drying unit A6 CRE 30 .....	0443 570 880
Pilot lamp .....	0153 143 886
Laser lamp .....	0457 788 880

---

## 6 ORDERING OF SPARE PARTS

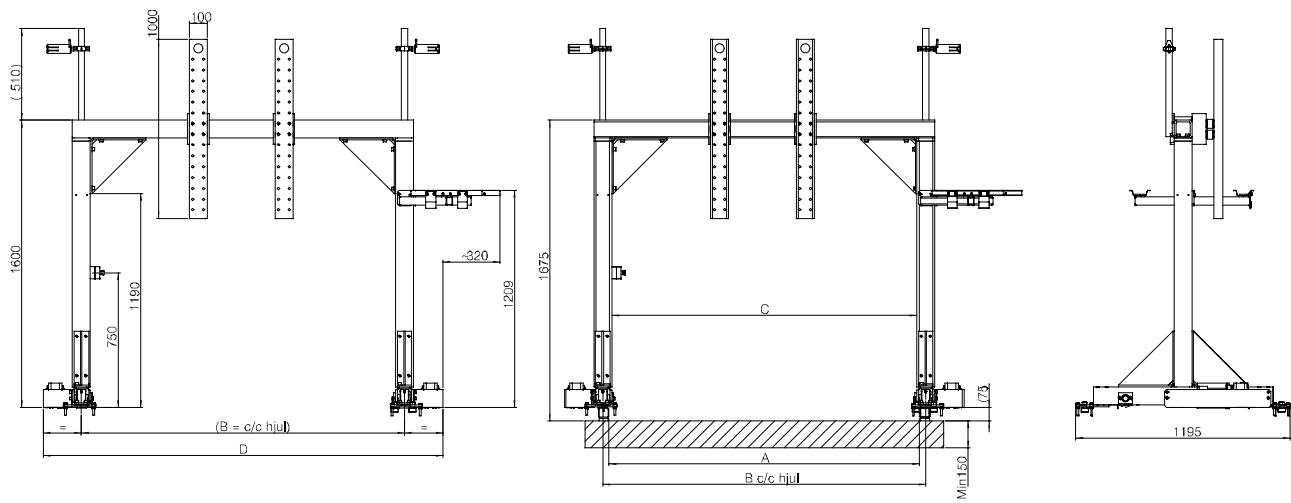

---

Spare parts are ordered through your nearest ESAB representative, see back cover. When ordering spare parts, please state machine type and number as well as designation and spare part number as shown in the spare parts list on page 21. This will simplify dispatch and ensure you get the right part.

## Dimension drawing

### Double version

Group	A	B	C	D
881	1730	1800	1700	2227
882	2100	2170	2070	2597
883	2500	2570	2470	2997
884	3000	3070	2970	3497

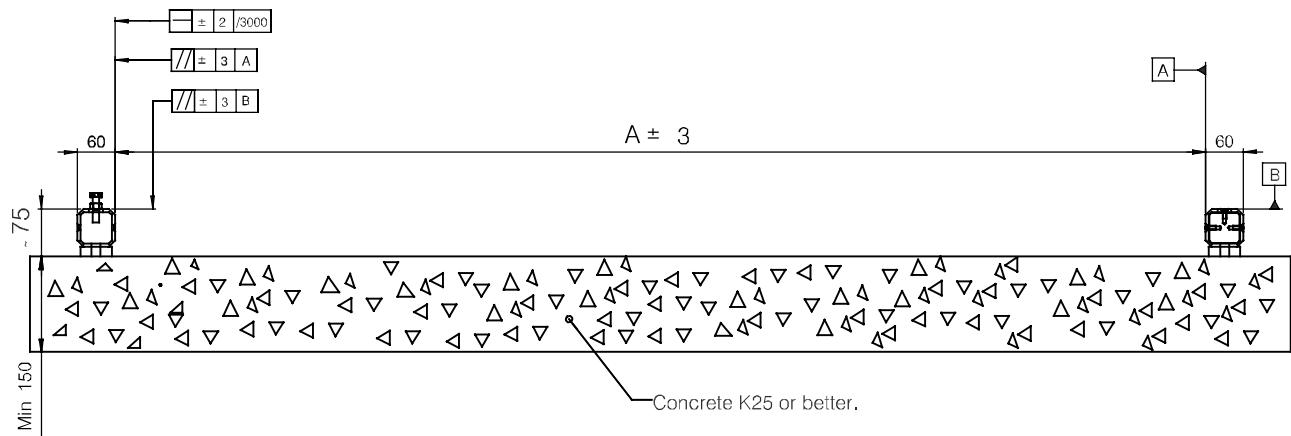

## Rail foundation

The rail is bolted with M12 bolts.

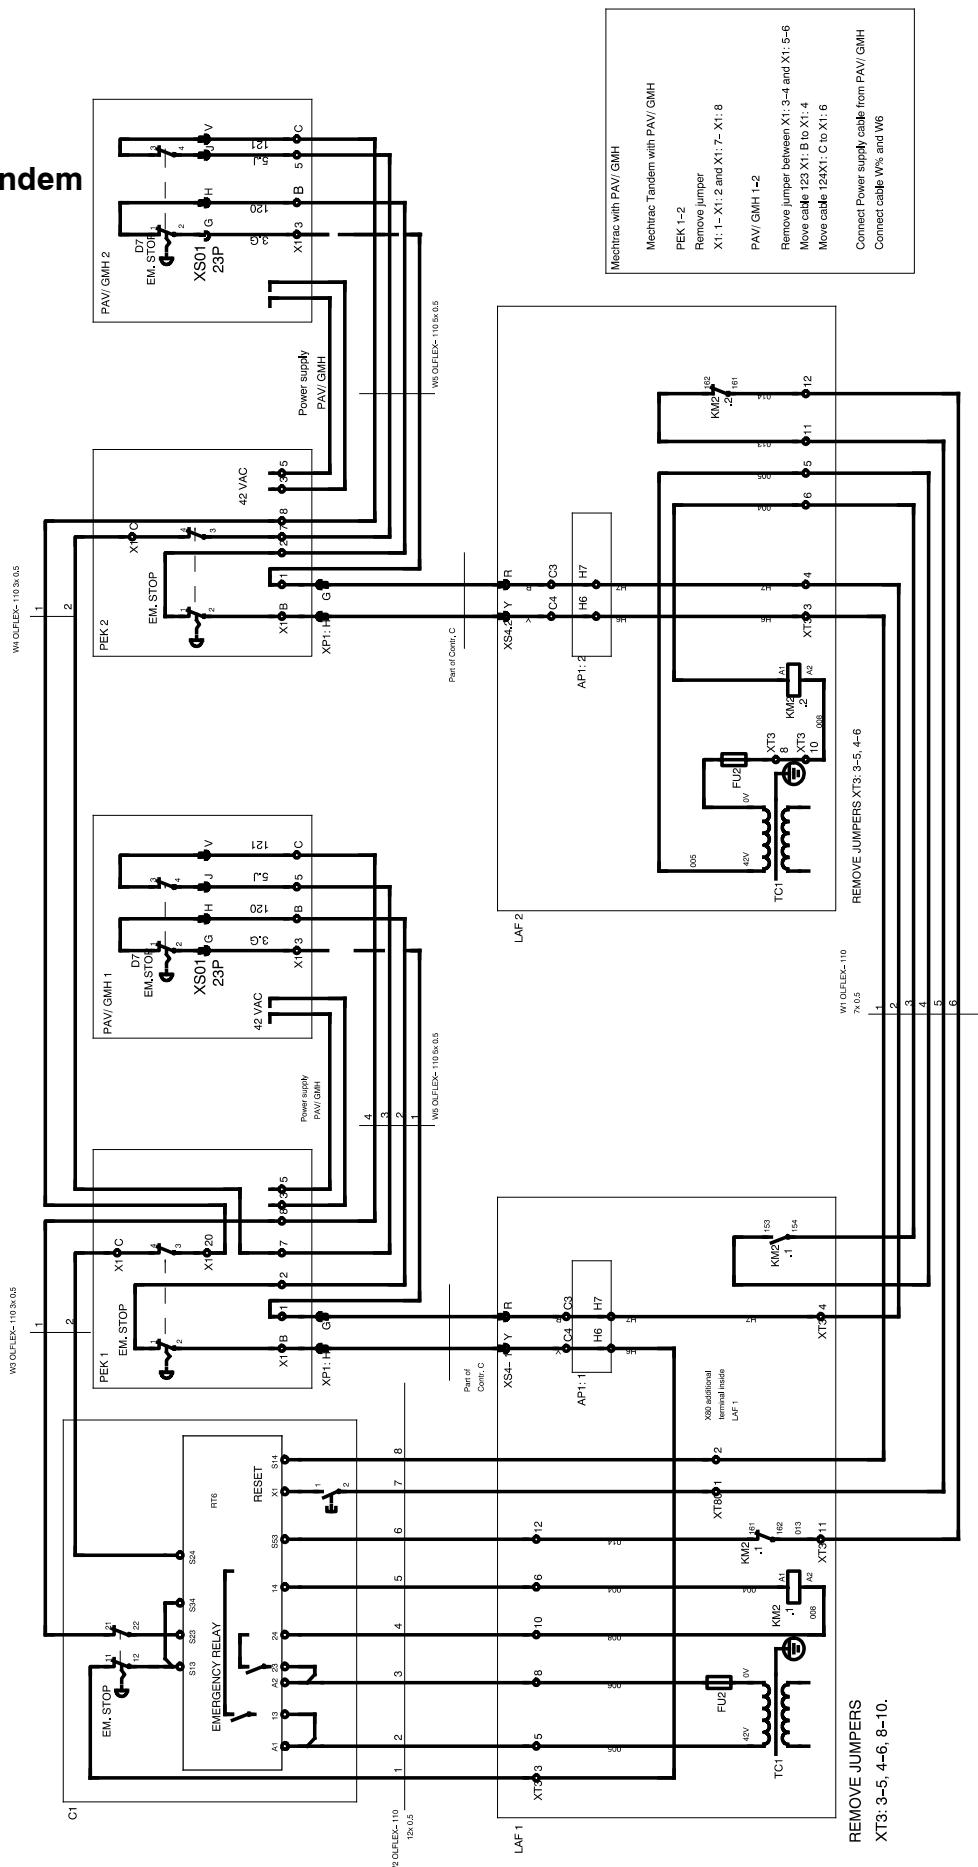

Use metal sheets of different thickness to adjust the rail according to dimensions.
